

Expect a massive day of mobile learning!

Today, we live in a smart-embedded environment that allows us to have capabilities and to do things that even a few short years ago would have been absolutely unimaginable.

This is your chance to gain insight into the fast-paced world of mobile devices, while hearing and learning from pioneers and practitioners about their experiences with the big picture stuff through to everyday classroom applications.

This exciting and action-packed one day programme is divided into five different sessions, with five workshop options (and one unconference option) within each time slot.

Take a look at the table below to see what's happening when:

Welcome	Workshop A	Workshop B	Workshop C	Workshop D	Workshop E
